Revision 02 2016
All prices are exclusive of VAT and installation.
An elegantly simple, yet well proven design, SeceuroGlide is robust, reliable and durable – offering secure protection for your car and home. A choice of low maintenance finishes, insulation and the convenience of remote automatic operation powered by a high quality Somfy drive unit as standard make SeceuroGlide an excellent all round choice.

SeceuroGlide’s aluminium slats lock into position to resist attack by intruders, while advanced insulation and brush sealing keeps out the cold and makes the door as weatherproof as it is secure. Vertical opening means you can make maximum use of your drive and garage space – parking safely just inches from the door.

SeceuroGlide doors are supplied complete with your choice of receiver; The SeceuroSense or The Rollixo. Both come with a choice of remote and include a courtesy light, bottom slat transmitter, optical safety edge and internal manual override.

‘A wide choice of finishes including Woodgrain and Painted Woodgrain help you to match your door to existing paintwork or woodgrain double glazing for a coherent look to your home’s exterior. Our SeceuroGlide Classic and SeceuroGlide Excel are also available powder coated to any RAL or BS number for a surcharge.

SeceuroGlide Excel combines all the benefits of SeceuroGlide Classic with an even higher security specification, and is officially tested and approved to Police and insurance standards. Available at a surcharge on the price of a SeceuroGlide Classic.

For SeceuroGlide, the Drive Through Width (DTW) when using 75mm guides is equivalent to Over Guide Width (OGW) minus 150mm.

* Except when the overguide is greater than 4600mm: DTW with 90mm guides is equal to OGW minus 180mm. SeceuroGlide Excel is always supplied with 90mm guides.

The Drive Through Height is equivalent to 55mm less than the guide height on the SeceuroSense system and 100mm with Rollixo.

# Please note these prices are for white or mid-brown boxes only. Boxes can be powder coated to match standard colour, but will be subject to a surcharge (page 10). Powder coated boxes may be a slightly different shade to the curtain. If powder coated end plates are required they will be subject to the standard surcharge, unless ordered with a half or full box in which case they are FOC. Also FOC on Woodgrain doors.

$ Other Renolit woodgrain finishes are available at the same cost as Mahogany, Rosewood, Golden Oak, White and Black/Brown, however longer lead times may apply. Please contact Customer Services for further details.

Security and resistance to high winds
SeceuroGlide Classic and Excel doors offer excellent security against intruders, combining a patented locking system, rolling code remote control technology and tough aluminium construction, independently tested to a minimum Class 2 wind resistance classification, which is equivalent to 59mph winds (Force 10 Storm).

SeceuroGlide general information

- Unless requested otherwise, tubular motors will be fitted on the left hand side of each door (when viewed from inside the garage looking out).
- Fascias, bottom and vision slats along with guide rails may be a slightly different shade to the curtain.
- Woodgrains and Painted Woodgrains are supplied with brown vision slats when required. Mahogany, Golden Oak and Rosewood Woodgrain doors are supplied with matching bottom slats and brown inner face guides and end plates as standard.
- Powder coated guide rails, bottom slats and where specified vision slats are supplied as standard.
- 45 degree box cover only applicable to doors with a 300mm head room.
- The minimum ordering width for SeceuroGlide is 1050mm over guides. For SeceuroGlide Excel, the minimum ordering width is 1500mm over guides.

- We recommend the use of photo cells in addition to the standard bottom slat sensor in garages where a vehicle will be parked close to the door. Moreover, where a door opens directly onto a pavement or in a public area, a combination of bottom slat sensor and photocells is a statutory requirement. Photo cells are not compatible as standard with SeceuroSense but can be specially ordered.
- All SeceuroGlide Excel doors are supplied with 90mm guide rails as standard.
- SeceuroGlide Excel must always be fitted internally.
- Low level override option not available for SeceuroGlide Excel. Where the garage door is the only means of exit from a garage a battery backup will be required.

SeceuroGlide Compact internal/external fitting roller garage door

The SeceuroGlide Compact has been developed especially for garages with limited headroom.

SeceuroGlide Compact’s insulated aluminium slats are narrower than those used for the SeceuroGlide allowing a tighter, smaller coil which requires just 8” (205mm) clearance above the opening height. An extensive range of sizes also means openings of up to 2880mm wide can be accommodated.

Extremely versatile, the door can be fitted either in front or behind the garage opening – or, drive-through height permitting, within the garage opening itself.

SeceuroGlide Compact with HALF box #90º fascia

The Compact features a rugged locking system for peace-of-mind security.

SeceuroGlide Compact with FULL box #90º fascia & 45º box lid

Security and resistance to high winds

Despite being slimmer than standard SeceuroGlide doors, Compacts still offer security against intruders, combining a sturdy locking system, rolling code remote control technology and tough extruded aluminium, independently tested to a minimum Class 2 wind resistance classification, which is equivalent to 59mph winds (Force 10 Storm).

SeceuroGlide Compact general information

■ Vision slats are NOT available on the Compact.
■ Please note the SeceuroGlide Compact will NOT require an anti-fall back device.
■ The minimum ordering width for SeceuroGlide Compact is 1050mm over guides.
■ SeceuroGlide Compact internal comes with a half box 90º fascia as standard.
■ SeceuroGlide Compact external comes supplied with a ‘full box’.
■ The Compact is a lower security design than the standard SeceuroGlide and is unsuitable for exposed locations – other products are available for this application - ask for details.
■ Powder coated guide rails, box and end plates are supplied as white, brown or green as standard. Should you wish the box, guides or end plates to be powder coated in a different colour to the standard colours available this is possible for a surcharge of: £30.65 for powder coated guide rails, £107 for powder coated guide rails and box and £20.45 for end plates.
■ To ensure compliance with the Construction Products Regulation SeceuroGlide Compact must be installed with either a SeceuroSense/ Rollixo remote control or a ‘hold-to-run’ switch or key switch.
■ We recommend the use of photo cells in addition to the standard bottom slat sensor in garages where a vehicle will be parked close to the door. Where a door opens directly onto a pavement or in a public area, a combination of bottom slat sensor and photocells is a statutory requirement.

SeceuroGlide Compact surcharge of £30.65 for guide rails and £107 for guide rails and box on Black, Burgundy, Navy Blue, Light Beige, Light Grey, Ivory, Silver Metallic and Anthracite finishes are supplied as white, brown or green as standard or white on request – ask for details.

Mahogany, Golden Oak, Rosewood, White or Black/Brown Woodgrain finishes are supplied on brown slats as standard or white on request. (Other base colours available at a cost of £31 per square metre NET). $ See page 2.

The Drive Through Width (DTW) when using 60mm guides is equivalent to Over Guide Width (OGW) minus 120mm.

The Drive Through Height is equivalent to 50mm less than the Guide Height.

† † Longer lead times may apply please check with customer services.

SeceuroGlide Compact profiles and sizes

SeceuroGlide Pricelist – Retail prices unless stated otherwise. All prices subject to VAT at current rate.
SeceuroGlide Manual the only insulated manual roller garage door on the market

Developed to the same high standards and build quality as the SeceuroGlide range, SeceuroGlide Manual offers the ideal solution for applications where electricity is not available.

The SeceuroGlide Manual has been engineered with ease of use in mind to provide the smoothest operation.

The key operated lock is located in the middle of the door. Integrated handles are located in the middle and at the bottom for convenient operation from inside or outside the garage.

The vertical opening means you can make maximum use of your drive and garage space – parking safety just inches from the door.

A choice of twelve low maintenance colours are available helping you to match your door to existing paintwork (not available in woodgrain).

Delivery, Packing & Warranties

DELIVERY SERVICE
Our standard delivery service covers England and Wales weekly, Scotland and Ireland fortnightly.

Pricing includes delivery on all orders over £4000 on our standard weekly service to England and Wales. Additional chargeable deliveries can often be arranged with Customer Services. We also offer home/site delivery service options with one or two men depending on the size of delivery and site conditions.

Delivery confirmations for our own dedicated service will be emailed or texted the previous afternoon if AM or PM the following working day. Please ensure an email address and/or mobile number is supplied on your order.

Compliance with the latest CE standards
The SeceuroGlide range is fully compliant with the latest European product directives and standards including BSEN 13241-1 applicable from the 1st May 2005.

SeceuroGlide peace-of-mind warranties
SeceuroGlide products are guaranteed against defect of material or workmanship by SWS UK, subject to correct installation, maintenance and operation, for a period of 5 years from date of purchase. In addition, Mahogany, Rosewood and Golden Oak Textured Woodgrain finishes carry a limited 10 year guaranteed. Please note darker coloured double doors that are exposed to significant direct sunlight may be susceptible to expansion which may interfere with the operation of the door.

SeceuroGlide extreme weather conditions
High winds and high temperatures can cause increased deflection of the door. It is the installer’s responsibility to ensure that the door is packed off the wall sufficiently to allow for door movement during these extreme weather conditions.
