the coach house

range of craftsman built garage doors

price list

April 2015

Welcome to the Woodrite garage door price list.

Here are the top ten items to note when using this price list:

1

Prices are in sterling and exclude VAT and delivery. Net delivery charges per door:
1 door £57, 2 doors £45. Mainland England and Wales - please call for other areas.

2

All sizes are for the opening into which the door will fit and are shown width x height - suitable clearance is built into the door panel to allow opening without binding.

3

All up and over doors are priced including retractable gear. Canopy gear is available on doors up to 8'0" x 7'0" (2438mm x 2134mm) as a no cost option.

4

Somerset, Buckingham, Balmoral and York doors are supplied with a base coat treatment ready for staining to the colour of your choice. Fully finished doors are available as an option in the colours listed. Warwick, Monmouth and Thetford doors are supplied fully finished as standard.

5

Timber is a natural material and will have variations in colour, shade and grain that will change over time as part of the normal ageing process.

6

If you are ordering doors to be fitted side by side please tell us and we will select timbers to produce a sympathetic match of colour and shade.

7

Drawings illustrate a single 7'0" x 7'0" door. (3'0" wide for personnel doors) Over 10'6" wide double doors have the appearance of two single doors side by side unless shown otherwise. Under 10'6" wide doors employ repeated features or wider features to achieve well balanced proportions.

8

The proportions of the door panels and the lock handle position may vary dependent upon the door size ordered even within doors of the same style.

9

Doors are supplied with a lock hole unless otherwise specified. Up & Over doors have the lock handle in the lower third of the door.

10

Made to measure sizes are available in mm increments. For pricing, locate the size band into which your door falls in the made to measure price tables.

The Coach House Collection

The Coach House Collection of garage doors sets the standard for design, durability and performance for timber garage doors. The ranges of doors are all hand-built from timber from managed renewable sources. Whatever style you select you can be confident you've chosen quality. Woodrite - "Good With Wood"!

Masta-Gear up & over

Woodrite's Masta-Gear operating mechanism combines with a lightweight & strong aluminium sub-frame for panel-constructed doors or fixes directly to solid-constructed doors. Masta-Gear is the most versatile up & over door gear on the market today.

Masta-Gear panel-constructed doors

The door panel is made first and the aluminium sub-frame and Masta-Gear operating mechanism is then built onto the door panel for maximum integrity. All doors have edge-to-edge timbers with no visible sub-frame from the outside.

Panel-constructed

Masta-Gear solid-constructed doors

The door panel is made first and the Masta-gear operating mechanism is then mounted directly onto the door panel for maximum integrity and a rear face free from bracings.

Solid-constructed

Super-Chassis up & over

A super-strong steel chassis with integrated lifting gear is at the heart of our Super-Chassis gear. The door chassis is built to the door size and the door panel is then mounted into the chassis for improved rigidity.

Panel-constructed

Woodrite's door panel design is unique in that it "cloaks" the chassis. Only beautiful timber is visible edge-to-edge from the front of the door. This innovative panel design eliminates the need for the visible chassis found on other makes of door.

Super-Chassis gear is available for doors from the Buckingham, Somerset, Monmouth, Thetford and Warwick ranges.

A large range of standard sizes is available and all sizes in-between within our made to measure service.

Super-Chassis is available with straight arm retractable gear as standard and canopy gear as a no cost option in the sizes as indicated with each range.

Page 31 - 33

Side hinged & personnel

Side hinged garage doors and personnel doors are constructed using traditional build methods employing mortice and tenoned joints. The side, top and bottom rails are all machined using 43mm thick timbers and rebated centre rails eliminate gaps between panels for added security.

Solid-constructed

Side hinged garage doors and personnel doors are hung with three brass-effect hinges per leaf or with the option of a pair of classic strap hinges in black or silver colour or traditional strap hinges in black wrought iron. Side hinged doors have a night latch and finger pull (commonly used on front doors) with the option of a mortice lock and lever set – see individual furniture packs for details. Personnel doors have a mortice lock and lever set as standard. Side hinged doors have shoot bolts top and bottom to secure the inactive leaf and door stays to hold the door in the open position. All Thetford doors are supplied with stainless steel fixing, hinges and mortice lock as standard (non-stainless options are not available).

Page 34

The Somerset Cedar Up & Over Range

A range of 12 up and over designs, many of which are also available as side hinged doors or matching personnel doors – see the York range for details. Doors are made with selected cedar mouldings and cedar faced ply. Up & Over doors are panel-built and suitable for use with Masta-Gear and Super-Chassis and available in standard and made to measure sizes.

Canopy gear is available as a no cost option on single doors in the sized listed with the range.

Page 4-5

The Buckingham Cedar Up & Over Range

A range of 24 up and over designs, many of which are also available as side hinged doors or matching personnel doors – see the York range for details. Doors are made with selected cedar mouldings, cedar tongue and groove boards and cedar raised and fielded panels dependent on style. Up & Over doors are panel-built suitable for use with Masta-Gear and Super-Chassis and available in standard and made to measure sizes.

Canopy gear is available as a no cost option on single doors in the sizes listed with the range.

Page 6-9

The Balmoral Cedar Up & Over Range

A range of 24 up and over designs, many of which are also available as side hinged doors or matching personnel doors – see the York range for details. Doors are made with selected cedar mouldings, cedar tongue and groove boards and cedar raised and fielded panels dependent on style. Up & Over doors are solid-built suitable for use with Masta-Gear and available in standard and made to measure sizes. Canopy gear is not available.

Page 10-13

The Monmouth Oak Up & Over Range

A range of 12 up and over designs that are fully finished as standard. Doors are made with selected oak mouldings and oak faced ply. Up & Over doors are panel-built and suitable for use with Masta-Gear and Super-Chassis and available in standard and made to measure sizes.

Canopy gear is available as a no cost option on single doors in the sized listed with the range.

Page 14-15

The Warwick Idigbo Up & Over, Side Hinged & Personnel Range

Idigbo is a hardwood that looks very like oak, yet is lower in price. A range of 24 up and over designs that are also available as side hinged doors or matching personnel doors. Doors are made with selected idigbo mouldings, idigbo tongue and groove boards and idigbo raised and fielded panels dependent on style. Up & Over doors are of solid-construction suitable for use with Masta-Gear with the option of panel-construction suitable for straight arm Masta-Gear and Super-Chassis and available in standard and made to measure sizes. Canopy gear is not available.

Page 16-23

The Thetford Accoya Up & Over, Side Hinged & Personnel Range

The Thetford range has 6 designs in solid-built & panel-built up and over garage doors, side hinged garage doors and personnel doors made with selected Accoya mouldings and tongue and grooved boards dependent on style. Up & Over doors are of solid-construction suitable for use with Masta-Gear with the option of panel-construction suitable for straight arm Masta-Gear and Super-Chassis and available in standard and made to measure sizes.

Page 24-27

The York Cedar Side Hinged & Personnel Range

A range of 28 side hinged and personnel designs. Doors are made with selected cedar mouldings, cedar tongue and groove boards and cedar raised and fielded panels dependent on style. York doors are of solid-construction and available in made to measure sizes.

Page 28-31

How to Order

1. Operation

First select your type of operation - up and over or side hinged or personnel.

2. Style

Select your preferred design or short-list a few alternatives. If you are ordering doors to be installed side by side, make this clear on your order.

3. Size

Locate the size you require from the standard sizing tables or the size band if the door is made to measure.

All sizes are for the opening into which the door will fit and are shown width x height - suitable clearance is built into the door panel to allow opening without binding. See page 32 onwards for full details on door and opening sizes.

4. Gear

Panel-built up and over doors from the Somerset, Buckingham, Monmouth, Thetford and Warwick ranges are available with Masta-Gear or Super-Chassis - specify your preference.

Solid-built up and over doors from Balmoral, Thetford and Warwick ranges are available with Masta-Gear only.

If your door is to be automated, you may wish to specify that no lock handle is required - leaving the door face clear.

Side Hinged and personnel doors can be specified with different hardware by selecting the alternative hardware packs from the option listings (Thetford doors are only available with stainless steel as stated).

5. Finish

Specify your finish - basecoat treated, primed for painting or one of the fully finished options. If you are trying to match to existing timbers please speak to a member of our customer service team for samples.

6. Frame

Specify your frame type, size and finish. If you are fitting within the reveal ensure you have allowed sufficient clearances for brickwork coursing tolerance - see page 32 onwards for full details. Don't forget to specify architrave to cover steel frames.

7. Options

Specify all the options you require such as window leading and handle type.

8. Get in touch

Our customer service team will be delighted to assist at any stage of the ordering process. If you need advice on sizing, operation or any aspect of the process just call. We can also assist with bespoke design requirements - let us know what you'd like and we'll bring it to life in wood!

THE SOMERSET RANGE is made with selected cedar mouldings and cedar faced exterior grade ply.
Doors are of panel-construction onto either Masta-Gear or Super-Chassis in standard or made to measure sizes as listed.

Retractable gear upgrade - single doors

Masta-Gear Standard on all doors up to 2743mm wide

Super-Chassis Available on door heights 1931mm, 1981mm & 2134mm on doors up to 2286mm wide

For full details of options see page 9

THE BUCKINGHAM RANGE is made with selected cedar mouldings, cedar tongue and groove boards and raised and fielded cedar panels depending on design. Doors are of panel-construction onto either Masta-Gear or Super-Chassis in standard or made to measure sizes as listed. Certain styles are available in solid-construction - see the Balmoral range for details.

* see illustrations above for double door configuration

Canopy gear available as a no-cost-option on doors up to 2438mm wide & 2134mm high.
Minimum height on Super-Chassis doors for Canopy gear is 6'4" (1931mm).

Coach house
monmouth

OPTIONS

Single doors ≤ 10'0" wide

Double doors > 10'0" wide

FRAMES

Timber Frames
Oak per linear m

70mm x 70mm single	70mm x 90mm single/double
98	98

Oak

All frames are supplied fully finished to match the door.

FINISHES

All doors are fully finished as standard in a choice of:

Natural Oak, Old Oak and Brackley Oak, Rustic Oak, Conker, Red Oak, Green Oak, Golden Oak, Mid Oak, Chocolate, Aged Oak, Midnight Oak

For full details of other options see pages 9

THE WARWICK RANGE is made with selected idigbo mouldings, idigbo tongue and groove boards and raised and fielded idigbo panels depending on design. Doors are of panel construction onto Super-Chassis or Masta-Gear in standard or made to measure sizes as listed. For finish and frame options see page 23 for all other options see page 13.

* see illustrations above for double door configuration

Painting your door?

Accoya is perfect for painting any RAL colour, Farrow and Ball paint or similar heritage paint finishes. The Accoya treatment process fixes all tannins and resins, ensuring no leaching of stains through the paint finish can occur, making Accoya the ideal timber to take a paint finish.

solid-built cedar

THE YORK RANGE is made with selected cedar mouldings, cedar tongue and groove boards and raised and fielded cedar panels depending on design. Doors are of solid-construction in made to measure sizes as listed.

Finishes

All doors are treated with a base coat ready for staining. Fully finished doors are also available in a range of colours. Woodrite uses the TEKNOS wood finish system for Cedar, Oak, Accoya and Idigbo and recommends this for on site finishing - contact Woodrite for your nearest stockist. Photographic and printing processes make it impossible to guarantee colours from this brochure and images are intended as a guide only.

Cedar

Idigbo

Oak

Accoya

The image right shows the effect of the base colour of the timber on the finished colour. All are Cedar, treated with our basecoat preservative (1), the first coat of Light Oak (2) and the final second topcoat of Light Oak (3).

The colour variation across a light, medium and dark mottled timber can be seen from left to right. All Woodrite doors are made from timbers selected to blend well for depth of colour, however, by its very nature, uniformity for every door is not possible.

Some doors will be made from predominantly darker timbers and some will be made from predominantly lighter timbers. Each will have a different density for the same colour finish so if you are matching to other timbers, talk to our customer services team about samples.

Delivered free when ordered with a door, + P&P when ordered separately.

Clearances & Dimensions

Doors should be fitted to a Woodrite steel frame or timber goalpost type frame. Doors can be fitted within or behind the garage reveal - see the details shown right. When fitting within the reveal a 3mm gap for timber frames and 5mm gap for steel frames on all three sides should be included in the size to allow for brickwork coursing tolerances.

Door sizes represent the inside dimensions of the frame. Up and over door sizes are approximately 19mm narrower and 25mm shorter to allow for operating clearances and tolerances.

A 19 mm square weather bead should always be fitted to the under-side of the door frame lintel in front of the door to hide the top gap. This feature is integral on Woodrite steel up and over frames.

H	49mm	49mm	70mm	70mm	50mm
D	40mm	40mm	70mm	90mm	70mm

Care & Maintenance

Doors Finish

These notes are for guidance only and do not form any part of the guarantee given with your door. Woodrite Doors Limited uses only the top grades of timber available, however timber is a natural product therefore colour, grain and finish will vary from panel to panel.

A regular visual inspection of your door is essential, with periodic cleaning of the door panel using warm water and a soft clean cloth or sponge. Allow the door to dry naturally, never use detergents, abrasives, caustic or solvent based cleaners as they may damage the door surface. Bird droppings should be removed immediately as these can be particularly caustic. Initial application and periodic treatment should be carried out strictly in accordance with the wood stain manufacturer's instructions. Failure to follow these instructions will result in early deterioration of the timber panel.

Doors Supplied Basecoated Light Oak (Western Red Cedar only)

Preparation

Lightly de-nib all surfaces with fine grade abrasive paper, e.g P280 or P320, rubbing in the direction of the grain to produce a smooth finish and provide a key for subsequent coats of decorative stain. Wash the surface with clean warm water to remove any dirt, grease and all de-nibbing dust and allow surfaces to dry naturally.

Method of Application

The stain should be applied in a full flowing coat, using a long synthetic bristle brush, laying off in the direction of the grain and using the minimum number of brush strokes necessary to produce an acceptable finish. Avoid over brushing, as this will reduce the protection afforded. Always pay special attention to any area of exposed end grain, tops and bottoms of doors and undersides of thresholds. Your door must be treated on both sides and all exposed timber to the sides, tops and bottoms.

Plywood doors + Raised and Fielded panel doors

Decide on whether to start on the left or the right hand side of the door. Coat the cedar moulding around the first panel then complete the panel itself, carefully wiping excess stain from the face of the moulded section with a damp cloth. Treat each panel in the same way until all panels are coated.

The faces of each of the vertical uprights between panels should then be coated, with any excess coating on horizontal rails wiped off with damp cloth to avoid build up of stain at each vertical/horizontal join. The top horizontal rail should then be finished and finally the bottom horizontal rail.

Tongue & Groove panels

Decide on whether to start on the left or the right hand side of the door. Coat the first section of boarding, leaving the outer rails until later. Brush the stain into the grooves

each side of the first board then fully coat the complete board. Carefully wipe off excess stain with a damp cloth from the outer vertical/horizontal rails to avoid build up of stain which may dry before the door can be completed. Brush stain in to the next groove and finish the board, remove excess as described above. Complete the full width of the door in the same manner. The top horizontal rail should be coated, followed by the bottom rail, finally finishing with the vertical rails.

Two coats of top coat stain should be applied to all exposed surfaces. The second coat should be applied to all exposed surfaces as soon as possible after the first coat has dried, but no sooner than 5 hours.

Weather Conditions

Do not apply if there is a risk of rain, high winds or when air temperatures are below 8°C or above 25°C during application and drying periods. Protect from frost and rain until dry, failure to meet these requirements may adversely effect the drying, visual quality and durability of the finish.

****Please note these are guidance notes only – always use a top quality water based stain and ensure you read the stain manufacturer's instructions carefully prior to finishing your timber door****

Maintenance of Fully Finished Western Red Cedar Doors and Existing Coatings

The period between maintenance applications will vary and is dependent upon the degree of exposure, elevation and design of the door panel. A lightening of colour, reduction in sheen as the coating erodes and a loss of water repellency indicate the need for maintenance. Follow instructions for the Basecoated door – if a definite colour change is chosen, more than one coat maybe required.

Doors Supplied White Primed (Western Red Cedar only)

Timber panels that have been supplied White Primed have been given one coat of a water borne tannin blocking primer that has been spray applied under factory conditions. Western Red Cedar can be problematic when using white or light colours as a finish - the soluble extractives contained within the timber that can leach through a water borne coating system.

To reduce the risk of this phenomenon occurring it is recommended that a solvent borne coating system is to be applied over the water borne primer. The primer is compatible with most commercially available solvent borne coating systems but it is always advisable to try a small test area. Even using a solvent borne system does not guarantee that it will not occur. Irrespective of the product selected, always follow the manufacturer's technical instructions and pay particular attention to end grain at the top and bottom of the doors.

Doors Supplied Fully Finished RAL Colours (Western Red Cedar Only)

Timber panels that have been supplied factory fully finished have been given one coat of a water borne tannin blocking primer and two top coats that have been spray applied under factory conditions.

Western Red Cedar can be problematic when using white or light colours as a finish - the soluble extractives contained within the timber that can leach through a water borne coating system. To reduce the risk of this phenomenon occurring when re-treating, it is recommended that a solvent borne coating system is employed. Always follow the manufacturer's technical instructions and pay particular attention to end grain at the top and bottom of the doors.

Fully Finished Idigbo, Accoya & Oak Doors

To help optimise the life of surfaces factory treated, the following procedures should be followed. All vertical treated surfaces should be at least annually cleaned to remove all atmospheric soiling. If you need to re-stain your door a fine grade abrasive paper e.g. P280 or P320 should be used, rubbing in the direction of the grain to produce a smooth finish and provide a key for subsequent coats of stain. Wash the surface with a damp clean cloth or sponge and allow surfaces to dry naturally.

Apply new coat of stain in accordance with the manufacturer's instructions.

Door Gear – Masta-Gear or Super-Chassis

Door lifting gear is guaranteed for a maximum of two years against any form or manufacturing defect from date of purchase. See the back page for applicable conditions.

Upon Installation

Immediately after the door is fitted and after every 5000 operations of the door, or at least once a year, oil all pivot points, check screws and clamp connections for tightness. Keep the running tracks clean (do not grease them) check parts and replace any worn components as necessary.

Springs should be replaced after approximately 25000 operations by an experienced door fitter.

Do not oil the lock cylinder. If it is sticking lubricate with graphite dust.

Check the lifting cables on canopy doors every 6 months with normal usage (8 ops per day). Cables should be replaced by an expert if any wear is found.

guarantee

Woodrite doors are guaranteed against any form of manufacturing defect or mechanical failure for a period of 2 years from the date of original purchase.

The exterior factory fully finished panel is guaranteed to provide a weatherproof membrane which will resist perforation of the substrate from the weather side due to corrosion for a period of up to 5 years (10 years for Accoya), dependent on location and position of door and provided door has been maintained in accordance with the manufacturers instructions.

conditions

1. During the comprehensive 2 year guarantee period Woodrite undertake to repair or replace (at its discretion), and without charge, products or components which have suffered any form of manufacturing defect. Claims must be notified within 3 days from the date of delivery or within a reasonable time after discovery of any defect.
2. Products covered by these guarantees must have been purchased through an authorised Woodrite garage door supplier or as original equipment attached to a newly built dwelling.
3. The warranties shall apply for normal use only. Normal use constitutes no more than 5 operations (open/close cycles) per day.
4. The warranties offered attach to Woodrite product only and no consequential damages will apply no matter how caused.
5. No liability will be accepted as a result of normal wear and tear, incorrect storage, incorrect handling, faulty installation, incorrect use or wilful damage.
6. Claims under this guarantee must be made through the original supplier and accompanied by relevant documentation indicating the date of purchase (e.g. receipt).
7. Woodrite's maximum liability shall be the original purchase price inclusive of Value Added Tax at the rate prevailing when supplied.
8. Any product which is the subject of a claim:
 - i) must have been correctly installed in accordance with the installation instructions supplied and thereafter properly maintained by a suitably experienced engineer on a regular basis as set out in the Maintenance and Operating Instructions provided with every door. (Additional copies of these instructions are available by contacting the installer or the manufacturing company). We recommend that regular maintenance is provided by a suitably experienced engineer.
 - ii) must have the manufacturers reference number still intact
 - iii) must not have been modified in any way.
9. Claims will not be accepted where the cause is due to:
 - i) impact or mechanical damage suffered during or following installation, e.g scratches, indentations, tears, scuffs or other surface abrasion.
 - ii) damage or discolouration caused by contact with any form of caustic, abrasive or corrosive substance, fumes, bird droppings, fire, smoke, floodwater, salts, acids, or from exposure to abnormal atmospheric pollution.
10. The Exterior Finish Guarantee applies only to the weatherside surface and where more than 5% of the surface area of the door is affected. Surfaces must be freely exposed to washing by rainfall and kept clear of accumulated dirt and debris and given equal exposure to local environmental conditions and consistent natural lighting conditions across the face of the door. Special attention is drawn to Clause (9) (ii).
11. **Basecoated timber doors** are supplied with a dip immersion coat of Teknos low build matt water based basecoat of light oak. This operation is for temporary protection for transit and installation purposes only. If the timber panel becomes exposed to excessive water splashes or rain it may result in water marks or stains which could effect the final coating of the door. The topcoat finish must be applied immediately after installation to all surfaces. We recommend a Teknos high build microporous water based finishing stain or equivalent.
12. **Fully finished RAL colours** - Tannin bleed through is possible with Western Red Cedar on white and pale colours. Whilst Woodrite Doors Limited uses tannin blockers within the primer, Woodrite will not guarantee against this phenomenon.
13. **Idigbo, Oak & Accoya** - The stain used will offer an up to 5 yr /10yr (accoya only) protection as per the guarantee, within this time scale you will find that the colour may fade. This is a natural process and does not effect the protection of the stain.
14. Due to the acetylation processes with Accoya the use of non-stainless steel fixings may result in the failure of these fixing - this will not be covered under warranty.
15. Storage – All doors are delivered with cardboard and shrink wrap protection, this should remain in place until final finishing on site. Doors must always be stored in an upright position and protected from possible contaminations prior to fixing. Do not store doors in direct sunlight. Do not puncture the polythene shrink wrap before installation. Do not expose doors to water contaminations, as staining may occur.
16. Attempted repairs by non-qualified individuals shall invalidate this guarantee.
17. The specific terms of this guarantee shall only apply to products purchased on or after September 2010 within the UK and Eire.
18. Woodrite garage doors and associated products are sold subject to the Woodrite's Standard Terms and Conditions of Sale, copies of which are available upon request. Woodrite shall not be liable as a result of any representation, implied warranty or other term or condition or for any consequential loss or damage, costs, expenses or other claims whatsoever except as expressly set out in these Terms and Conditions of Sale.

General Advice

Door Cleaning. Periodically clean the door panel using warm water and a soft cloth or sponge. Allow to dry naturally. Never use detergent, abrasive, caustic or solvent based cleaners as they may damage the door surface. Bird droppings should be removed immediately as these can be particularly caustic.

Door Servicing and Maintenance

All doors should be operated and maintained in line with operating and maintenance instructions supplied with every door. Every six months visually inspect all wear items (including cables) for signs of wear. If wear is detected we recommend you contact your supplier to arrange for a replacement. Garage door springs are under extreme tension and should only be repaired or replaced by a suitably qualified engineer.

Other performance issues affecting Woodrite garage doors are:

The fully finished factory option is supplied in various coloured woodstains and can provide up to 5 years erosion period (dependant on location and position of door). If the door becomes affected by rain soon after installation you may notice a milky coloured staining on the finish of the door and where the sealant is used, this will disappear when dry. This is common phenomenon in water based coatings and over a period of time this will disperse and disappear, this has no adverse effect on the quality and finish of the door.

Woodrite doors are individually handcrafted products manufactured to specific customer order. Due to the nature of the product and the hand finishing processes used they may occasionally display small blemishes which do not detract from the overall appearance of the product. These are regarded as being within manufacturers tolerance when such blemishes are not visible to the naked eye when viewed from a distance of three metres.

Similarly, Timber products will display colour variations across their surface and colour will vary from door to door. Ordering doors to match helps reduce the variation but will not eradicate it entirely.

Woodrite's timber doors are made from the finest timber obtained from managed and sustainable sources. Prior to fitting they must not be stored in direct sunlight or exposed to splashes or rain as colour fading and/or staining may result. Woodrite's product guarantee does not cover natural variations in colour, warping, swelling or shrinkage due to the ordinary natural processes of ageing, fading or the effects of weather or climate nor does it cover the incidence of similar degradation which could have been prevented by carrying out finishing and maintenance procedures as recommended by Woodrite. Doors that are not factory finished should be finished with a microporous stain, front and back, in accordance with the stain manufacturers instructions immediately after fitting.

Garage doors should be inspected upon delivery and viewed in natural daylight (not direct sunlight) from a standard distance of 3 metres to view their overall appearance. From this distance the door panel should appear free from visible marks or distortion, stains, blemishes, indentations or scuffs. If any marks are only visible within 3 metres they will not be considered under warranty.

These terms and conditions do not affect your statutory rights.
